IVR Ships Information System

An international and unique vessel database

The IVR has maintained a European Ships Register since 1879. Since 2014, this data has been available online in the IVR Ships Information System. This database contains a comprehensive set of data of around 20,000 inland waterway vessels across Europe and is accessed and updated daily. The data consists of vessel, hull, engine, certificate and owner data.

Online access anytime, anywhere with a subscription

A subscription to the IVR Vessel Information System gives you 24/7 access to the online database. It allows you to consult the data per looked-up vessel for inspection (i.e. you cannot export or edit the data). The data are categorised by module. Depending on your requirements, you can expand the standard subscription with additional modules.

One-time or frequent customised data delivery

In addition to the subscription, we also offer the option of providing customised vessel data in an Excel file. With the Excel file, you can sort and filter the requested data yourself and create your own statistics, in accordance with our General Terms and Conditions (enclosed). Depending on your requirements, we can prepare a tailor-made quotation.

You can order both a subscription and a customised data delivery separately, or in combination. IVR members benefit from a discount on subscriptions and data deliveries. Contact the IVR secretariat for a nonbinding consultation.

Demo IVR Ships Information System

To give you an impression of what our online subscription form looks like, we have made a demo version available online. This demo version contains only a limited number of ships. However, all modules are released and visible in the demo.

NEW! Emission Calculation Tool

New in the IVR Ships Information System is the Emssion Calculation Tool. Using various (vessel) data, this tool allows you to calculate an indication of the current emissions of an inland vessel and thus also gain insight into the efficiency of the vessel. Use of the tool is free of charge and anonymous for all ship owners and users of the IVR Ships Information System. For more information about this tool, contact the IVR secretariat.

Which data in the IVR Ships Information System?

European inland navigation fleet - Countries

IVR collects and manages data from the entire European inland navigation fleet. Most of this fleet is registered in the Netherlands, Germany, Belgium and France.

Netherlands	8500+ vessels
Germany	3600+ vessels
Belgium	2100+ vessels
France	1800+ vessels

** the database is updated daily. The above numbers are therefore approximate and no rights can be derived from them.*

Registered ships in Romania, Croatia, Luxembourg, the Czech Republic, Switzerland and other European countries are also found in the database.

Type of use & Vessel types

In our database maken we categorise 5 different types of uses:

Dry cargo

Tank cargo

Passenger

Push/tug

Other

Within these types of uses, different vessel types can be distinguished. On the next page you will find an overview of the different vessel types per section.

Available data fields per ship

The data fields are divided into modules. The Standard module contains general information about the vessel, including vessel name, ENI number and year of construction. The Standard module within a subscription or separate data delivery can be extended with the Owner and/or Hull/ Technique modules. These include details of owners, certificates, deadweight tonnage, engine data and other technical data. For a detailed overview of all available data fields, see page 4.

Available Fields

STANDARD SUBSCRIPTION

- ENI Number
- Name of vessel
- Company name / Owner name
- Vesseltype
- Country of Registration
- Deadweight tonnage
- Year of construction
- Length in cm
- Total kW main engines
- Port of registry

ADDITIONAL MODULE - OWNER

- Company name / Owner name
- Postal addreas - street and number
- Postal addreas - postal code
- Postal addreas - city
- Postal addreas - country
- Phone number
- E-mail address
- Chambre of Commerce
- Operator

ADDITIONAL MODULE - HULL AND TECHNIQUE

Certificats information

- Registration number
- Registration country
- Registration city
- Registration date
- Certificate type
- Certificate number
- Certificate city of issue
- Certificate date of issue
- Certificate expiration date
- Certificate issued by
- Additional certificates
- ADN certificate
- ADN certificate number
- ADN certificate city of issue
- ADN certificate date of issue
- ADN certificate expiration date
- GA (Green Award) certificate type
- GA certificate number
- GA certificate date of issue
- GA certificate expiration date
- Measurement certificate - number
- Measurement certificate - city of issue
- Measurement certificate - date of issue
- Measurement certificate - expiration date

Hull information

- Year of construction
- Hull building yard
- Hull building yard city
- Building yard
- Building yard city
- Year of conversion
- Conversion yard
- Conversion yard city
- Classification Society
- Deadweight tonnage
- Displacement
- Length in cm
- Width in cm
- Draught in cm
- Headroom in cm
- Freeboard in cm
- Moulded depth in cm
- Number of holds
- Number of tanks
- Number of passengers

Engine

- Number of main engines
- Total kW main engines
- Main engine manufacturer
- Main engine type
- Main engine kW
- Main engine year of construction
- Main engine RPM
- Main engine type emission level type
- Auxiliary engine 1 manufacturer
- Auxiliary engine 1 type
- Auxiliary engine 1 kW
- Auxiliary engine 1 year of construction
- Auxiliary engine 1 RPM
- Auxiliary engine 1 emission level type
- Auxiliary engine 2 manufacturer
- Auxiliary engine 2 type
- Auxiliary engine 2 kW
- Auxiliary engine 2 year of construction
- Auxiliary engine 2 RPM
- Auxiliary engine 2 emission level type
- Bow Thruster kW
- Bow Thruster Year of construction

Specifics

- Vessel type group
- Areas of navigation

Disclaimer: not all fields are always available for each vessel, this depends on the availability of various data.from our sources. For more specifics on availability of data, please contact the IVR secretariat.

GENERAL CONDITIONS FOR THE OFFER AND DELIVERY OF DATA OUT OF THE IVR SHIPS INFORMATION SYSTEM

IN GENERAL

These conditions refer to each offer and delivery of the data of the IVR Ships Information System at the address of the purchaser, indicated hereafter as “user”. They include all the data which are provided web based, electronically or printed.

INTELLECTUAL PROPERTY AND RIGHT OF USERS

The data package is protected by the right of intellectual property of the IVR. The IVR has the exclusive right to copy and publish (parts of) this data and to change the software as well as to mention her name on it.

Under the conditions of this contract the user receives the following rights:

a) non exclusive and non-transferable right to use the delivered data;
b) to make copies for backup-reasons.
By making copies for backup-reasons all data and marks like copyright notions and others have to be copied.

The user is not allowed:

a) to (let) remove or to (let) change the above mentioned marks;
b) to change, adapt, convert, imitate or manipulate in any way the data package or parts of it as well as let it be done by a third party;
c) to rent, alienate, assign the rights to third parties, or give anyone the permission to copy the data or parts of it.

PROTECTION

The user protects the IVR from claims of third parties which result from not observing the conditions. In any case of violation or non-fulfilment of any of these conditions concerning the copyright, the user is due to pay a directly claimable, undeductable penalty at the amount of € 10.000,00 in each case, without prejudice to other legal rights of the IVR.

RIGHT TO CANCEL

The IVR has the right to cancel the agreement with the user in compliance with a reasonable period with reimbursement of the agreed allowances pro rata temporis if the availability of reliable data cannot be guaranteed any longer.

LIABILITY

The IVR is not liable for any incompleteness or inaccuracy of the data made available and possible consequences.

JURISDICTION/APPLICABLE LAW

All arising of disputes between the user and the IVR, which cannot be settled amicably, will be submitted to the exclusive jurisdiction of the court in Rotterdam.
Dutch law is applied on all deliveries.
